Persyaratan Keselamatan di Site Site Safety Requirements

1. Tujuan

Tujuan dari instruksi kerja ini adalah untuk menjelaskan kepada para pekerja mengenai peraturan dan persyaratan keselamatan dalam bekerja di Site.

Jika diperlukan instruksi kerja ini dapat lebih diperluas dan dikembangkan dengan instruksi tambahan, pedoman atau gambar oleh setiap Divisi atau Departemen.

2. Definisi

Site

Area BTS atau area pekerjaan telekomunikasi baik greenfield (di bawah/di permukaan tanah) atau rooftop (di atas bangunan/gedung), dimana biasanya terdapat pagar pembatas antara area di dalam dan di luar Site tersebut.

• Alat Pelindung Diri (APD)

Alat atau perlengkapan yang wajib digunakan untuk melindungi dan menjaga keselamatan pekerja saat melakukan pekerjaan sesuai dengan potensi bahaya dan resiko pekerjaannya.

• Full Body Harness

Salah satu APD yang wajib dikenakan saat bekerja di ketinggian, berupa sistem penahan yang dikenakan di badan yang berfungsi untuk menahan pemakai APD tersebut agar tidak jatuh ke tanah.

Lanyard

Tali pendek yang dipasang pada Full Body Harnes yang dipakai pekerja, yang menghubungkan pekerja dengan tower atau sistem penahan, berfungsi untuk menahan jatuh.

W@H

Singkatan dari *Working at Height*, artinya bekerja di ketinggian. Siapapun yang bekerja di ketinggian harus sudah dilatih, bersertifikasi dan memiliki lisensi W@H.

3. Tanggung Jawab

Setiap personil dibawah ini bertanggung jawab sesuai dengan kompetensinya pada setiap aktivitas yang ada pada prosedur ini:

- Manajer Proyek
- Regional & Zone Manager
- Perwakilan Keselamatan dan Kesehatan Kerja
- Seluruh karyawan terkait

1. Purpose

The purpose of this work instruction is to explain to workers the safety rules and requirements for working on the Site.

If necessary this work instruction can be expanded and developed with additional instructions, guidelines or regulations by each department..

2. Definitions

• Site

BTS areas or telecommunications work areas both greenfield (below/on the ground) or rooftop (on top of buildings), where there is usually a fence/guardrail between the areas inside and outside the Site.

• Personal Protective Equipment (PPE)

Tools or equipment that must be used to protect and maintain the safety of workers when carrying out work in accordance with the potential hazards and risks of their work.

• Full Body Harness

One of the PPE that must be worn when working at height, in the form of a restraint system that is worn on the body that serves to hold the wearer of the PPE from falling to the ground.

Lanyard

Short straps mounted on Full Body Harnes used by worker, which connect worker to tower or retaining systems, serve to hold the wearer from falling.

W@H

Abbreviation for Working at Height. Anyone who works at an altitude must be trained, certified and have a W@H license.

3. Responsibilities

Each of the following personnel is responsible in accordance with its competence in any activity that is in this procedure:

- Project Manager
- Regional & Zone Managers
- Occupational Health and Safety Representatives
- All employees related

4. Referensi

- UU No.1 Tahun 1970 tentang Keselamatan Kerja
- PP No. 50 Tahun 2012 tentang Sistem Manajemen Keselamatan dan Kesehatan Kerja
- Pedoman Keselamatan, Kesehatan Kerja dan Lingkungan (K3L) PT Indo Human Resource
- OHSE-WI-03 "Alat Pelindung Diri (APD)".

5. Persyaratan Keselamatan di Site

5.1 Peraturan Keselamatan di Dalam Area Site

- Siapapun yg memasuki area Site wajib memakai minimal APD: Helm Keselamatan dan Sepatu Keselamatan
- Personil yang belum training W@H tidak diperbolehkan memanjat Tower
- Personil yang tidak memakai Fullbody Harness tidak diperbolehkan memanjat Tower
- Selalu kaitkan Lanyard saat di atas Tower
- Dilarang merokok di dalam area Site.

5.2 Persyaratan Keselamatan Bekerja di Site

A. Perlengkapan Keselamatan

- Rambu Keselamatan
- Nomor Telepon Darurat dan Jalur Komunikasi Kecelakaan
- Pita Pembatas
- Perlengkapan P3K
- Alat Pemadam Api Ringan (APAR)
- Alat keselamatan lain/rambu, dsb (mis. Safety Cone, Rompi Keselamatan, kantong peralatan saat memanjat Tower, dsb).

B. Alat Pelindung Diri (APD)

- Helm Keselamatan
- Full Body Harness, yang dilengkapi dengan Shock Absorber double Lanyard dan Work Positioning Lanyard (khusus untuk bekerja di ketinggian)
- Sepatu Keselamatan
- Sarung Tangan Keselamatan
- Kacamata Keselamatan (bila diperlukan)
- Rompi Keselamatan (bila diperlukan)
- Wrist Strap (untuk pekerjaan dgn perangkat TI).

- Act Nr. 1 Year 1970 on Occupational Safety
- Govt. Regulation Nr. 50 Year 2012 on Occupational Health and Safety Management System
- PT Indo Human Resource Occupational Health, Safety and Environment (OHSE) Manual
- OHSE-WI-03 "Personal Protective Equipment (PPE)"

5. Site Safety Requirements

5.1 Safety Regulations Inside the Site Area

- Anyone entering the Site area must use a minimum of PPE: Safety Helmet and Safety Shoes
- Personnel who have not been training W@H are not allowed to climb the Tower
- Personnel who do not wear Fullbody Harness are not allowed to climb the Tower
- Always attach Lanyard when work on Tower
- No smoking inside the Site area.

5.2 Work Safety Requirements at Site

A. Safety Equipments

- Safety Signs
- Emergency Telephone Numbers and Accident Communication Line
- Barricade Tape
- First aid kit
- Fire Extinguisher
- Other safety equipment/signs, etc. (eg Safety Cones, Safety Vests, equipment bag for climbing the Tower, etc.).

B. Personal Protective Equipment (PPE)

- Safety Helmet
- Full Body Harness, which is equipped with a Shock Absorber double-Lanyard and Work Positioning Lanyard (specifically for working at height)
- Safety Shoes
- Safety Gloves
- Safety Glasses (if needed)
- Safety Vest (if needed)
- Wrist Strap (for work with IT devices).
